

SHAIFALI GARG

Analytical Thinker | Quantitative Researcher | BI Manager

Professional Summary

Analytical thinker with strong mathematical foundations and ten years tackling complex problems across quantitative disciplines from supply chain optimization to predictive modeling and demonstrated technical excellence. Cross-disciplinary expertise combining business analytics, computer science, and applied mathematics. Proven ability to rapidly learn new domains and apply rigorous analytical frameworks. Strong communicator translating complex quantitative concepts for interdisciplinary teams. Curiosity-driven researcher committed to leveraging analytical expertise to build impactful systems. Genuine drive to build AI systems.

Core Competencies

Math Modeling, Statistical Analysis, Problem Solving, Quantitative Research, Predictive Analytics, Machine Learning, Rapid Learning, Hypothesis Testing, Regression Analysis, Time Series, Neural Networks

Work History

Manager Business Intelligence and Reporting

07/2022 - Present

Power Department, Walmart Inc, Bentonville, USA

- Apply rigorous analytical frameworks and mathematical modeling to solve complex business problems
- Lead cross-disciplinary teams fostering collaborative problem-solving and continuous learning culture
- Translate complex quantitative insights into clear, actionable recommendations for executive leadership
- Design advanced analytical solutions leveraging statistical methods, predictive modeling, and ML algorithms
- Demonstrate rapid learning agility by mastering new domains, tools, and methodologies

Senior Data Analyst

07/2022 - 07/2022

Supply Chain, Walmart Inc, Bentonville, USA

- Developed 20+ dashboards translating complex data patterns into clear visualizations for diverse stakeholders
- Applied time series forecasting models for transportation demand, balancing complexity with applicability
- Elevated customer satisfaction 60% to 95% through rigorous root cause analysis and systematic frameworks
- Tackled inventory optimization for 1,500+ SKUs using mathematical modeling and constraint optimization

Research Analyst

08/2021 - 12/2021

Southern Methodist University, Dallas, USA

- Developed mathematical models in Python quantifying marketing impact on consumer behavior
- Built neural network models predicting performance arts attendance during COVID-19 unprecedented conditions
- Created interactive web application (RShiny & SQL) enabling exploration of complex predictive models

R&D Quality Assurance Manager

09/2020 - 08/2021

Dassault Systems Solutions Lab, Pune, India

- Led team of 7 automating analytical workflows (Power BI), achieving 10% revenue increase
- Defined 100+ KPIs for 6 product launches, establishing rigorous quantitative measurement frameworks
- Created dashboards translating complex clinical trial data into accessible insights for medical stakeholders

Business Analyst Intern

01/2022 - 06/2022

Aezion Inc, Dallas, USA

- Applied quantitative risk analysis to \$2B programs using Monte Carlo simulations
- Achieved 20% supply chain cost reduction through analytical insights

Senior Consultant

05/2019 - 09/2020

Publicis Sapient, Gurgaon, India

- Performed EDA using advanced statistical techniques (Q-Q plots, correlation analysis)
- Conducted rigorous root cause analysis improving software quality

QA Analyst

05/2018 - 05/2019

Capgemini, Pune, India

- Led analytical team developing quantitative models for media supply chain optimization
- Performed EDA on financial loan data uncovering behavioral patterns and risk factors

Senior Data Analyst

06/2014 - 05/2018

Infosys Ltd, Pune, India

- Applied hypothesis testing, regression, correlation for strategic business decisions
- Performed linear programming and sensitivity analysis for resource optimization

Education

MS in Business Analytics (GPA: 3.7/4.0)

Southern Methodist University, Dallas | 2021-2022

Coursework: Statistical Analysis, ML, Predictive Modeling, Decision Optimization, Time Series

BS in Computer Science & Engineering

Lingaya's University, India | 2010-2014

Foundation: Algorithms, Data Structures, Computational Math, Database Systems

Technical Skills & Methodologies

Programming & Tools: Python (NumPy, Pandas, Scikit-learn), R (Statistical Analysis), SQL, Tableau, Power BI, GCP BigQuery, Alteryx, Dataiku, Excel (Advanced Analytics)

Analytical Methods: Hypothesis Testing, Regression (Linear, Logistic, Multiple), Time Series (ARIMA, Prophet), Neural Networks, Decision Trees, Clustering, Monte Carlo Simulation, Linear Programming, Sensitivity Analysis, Root Cause Analysis, A/B Testing, EDA

Analytical Projects

Statistical Decision Modeling: Applied hypothesis testing, multiple regression, correlation for multi-million dollar acquisition evaluation (Sleep Cool Mattress)

Consumer Behavior Analysis: Analyzed large-scale Six Flags data identifying behavioral patterns; built interactive Tableau dashboards

Optimization Modeling: Performed linear programming & sensitivity analysis for LEGO production planning and resource allocation

Certifications & Commitment

- **Certifications:** Dataiku Core Designer | Bloomberg Market Concepts | Python Data Science Toolkit (DataCamp) | Data Analytics in R | Lean Six Sigma Yellow Belt (AIGPE)
- **Continuous Learning:** Rapidly mastered new platforms (Dataiku, Alteryx) demonstrating intellectual curiosity and adaptability
- **Cross-Disciplinary Impact:** Successfully applied expertise across supply chain, healthcare, finance, social media, performing arts
- **Collaborative Excellence:** Effective communication with technical teams, business stakeholders, and academic researchers
