

CORE COMPETENCIES

- Math Modeling
- Statistical Analysis
- Quantitative Research
- Predictive Analytics
- Machine Learning
- Hypothesis Testing
- Regression
- Time Series
- Neural Networks
- Problem Solving
- Rapid Learning

TECHNICAL SKILLS

Programming & Data
Python (NumPy, Pandas, Scikit-learn), R, SQL, GCP BigQuery, Tableau, Power BI, Alteryx, Dataiku, Advanced Excel, Git, VS Code

AI & Automation
GitHub Copilot, Code Puppy, Microsoft Copilot, AI Innovation Lab, Wibey, Power Automate — **built custom multi-agent AI systems & workflow automations.**

Analytical Methods
Regression (Linear, Logistic, Multiple), Time Series (ARIMA, Prophet), Neural Networks, Decision Trees, Clustering, Monte Carlo Simulation, Linear Programming, Sensitivity Analysis, Root Cause Analysis, A/B Testing, EDA

DOMAINS

- Supply Chain & Retail
- Facilities Services
- Healthcare & Finance
- Social Media
- Performing Arts

SHAIFALI GARG

ANALYTICAL THINKER · QUANTITATIVE RESEARCHER · DATA ANALYTICS MANAGER
shaifali.garg@walmart.com  gecgithub01.walmart.com/s0g0em7

PROFESSIONAL SUMMARY

Analytical thinker with strong mathematical foundations and ten years solving complex problems across quantitative disciplines — from supply-chain optimization to predictive modeling. Cross-disciplinary expertise grounded in business analytics, with a proven ability to rapidly learn new domains and apply rigorous analytical frameworks. A strong communicator who translates complex quantitative concepts for interdisciplinary teams, and a curiosity-driven researcher committed to building impactful AI systems.

EXPERIENCE

Data Analytics Manager 2022 – Present
Facilities Services · Walmart Inc, Bentonville, USA

- Architected new finance & PO workflows in **Phoenix (Quickbase)**, syncing financial data directly from SAP to run the business end-to-end.
- Lead cross-disciplinary teams and translate complex quantitative insights into clear, actionable recommendations for **executive leadership**.
- Design advanced analytical solutions leveraging statistical methods, predictive modeling, and **ML algorithms**.
- Own the full BI/reporting lifecycle — requirements, prototyping, specs, validation, dashboards, and rollout — presenting results to senior leadership.
- Hire, train, and mentor associates on modern tools (**Code Puppy, Copilot**), fostering a continuous-learning culture.

Senior Data Analyst 2022
Supply Chain · Walmart Inc, Bentonville, USA

- Built **20+ dashboards** turning complex data patterns into clear visualizations for diverse stakeholders.
- Applied time-series forecasting for transportation demand, balancing model complexity with usability.
- Lifted customer satisfaction from **60% to 95%** through rigorous root-cause analysis.
- Optimized inventory across **1,500+ SKUs** using mathematical modeling and constraint optimization.

Business Analyst Intern 2022
Aezion Inc, Dallas, USA

- Ran quantitative risk analysis on **\$2B programs** using Monte Carlo simulation.
- Delivered a **20% supply-chain cost reduction** through analytical insights.

Research Analyst 2021
Southern Methodist University, Dallas, USA

- Built Python models quantifying marketing impact on consumer behavior.
- Developed **neural networks** predicting performing-arts attendance through COVID-19 volatility.
- Shipped an interactive **RShiny + SQL** app for exploring predictive models.

CERTIFICATIONS

- ✓ Dataiku Core Designer
- ✓ Bloomberg Market Concepts
- ✓ Python Data Science Toolkit — DataCamp
- ✓ Data Analytics in R
- ✓ Lean Six Sigma Yellow Belt — AIGPE

EDUCATION

MS, Business Analytics

Southern Methodist University, Dallas · 2021–2022 · GPA 3.7/4.0
Statistical Analysis, ML, Predictive Modeling, Decision Optimization, Time Series.

BS, Computer Science & Engineering

Lingaya's University, India · 2010–2014
Algorithms, Data Structures, Computational Math, Database Systems.

KEY STRENGTHS

- Built custom multi-agent AI systems & automations
- Rapid mastery of new platforms (Dataiku, Alteryx)
- Cross-disciplinary impact across 6+ domains
- Clear communication with technical, business & academic stakeholders
- Team leadership & mentoring

EXPERIENCE (continued)

R&D Quality Assurance Manager

2020 – 2021

Dassault Systèmes Solutions Lab, Pune, India

- Led a team of 7 automating analytical workflows (Power BI), driving a 10% revenue increase.
- Defined 100+ KPIs across 6 product launches, establishing rigorous measurement frameworks.
- Created dashboards translating clinical-trial data into accessible insights for medical stakeholders.

Senior Consultant

2019 – 2020

Publicis Sapient, Gurgaon, India

- Performed EDA using advanced statistical techniques (Q-Q plots, correlation analysis).
- Conducted rigorous root-cause analysis that measurably improved software quality.

QA Analyst

2018 – 2019

Capgemini, Pune, India

- Led an analytical team developing quantitative models for media supply-chain optimization.
- Performed EDA on financial loan data, surfacing behavioral patterns and risk factors.

Senior Data Analyst

2014 – 2018

Infosys Ltd, Pune, India

- Applied hypothesis testing, regression, and correlation for strategic business decisions.
- Performed linear programming and sensitivity analysis for resource optimization.

SIGNATURE PROJECTS

- ◆ **Phoenix (Quickbase) Finance Platform** — Designed processes & workflows to run business and finance across all POs, sourcing financial data directly from SAP.
- ◆ **EOL Electrical Analysis (Multi-Agent)** — Automated end-of-life analysis with 4 parallel Quickbase agents: locates the latest diagram model, converts it to Excel, and loads it into Phoenix.
- ◆ **Power Automate Ticketing Bot** — Copies email comments into the DRT tied to each ticket, saving roughly 7 hours every day.
- ◆ **Code Puppy Diaries (Live)** — Ongoing AI-assisted development experiments, automations, and learnings, versioned on Walmart Enterprise GitHub.
- ◆ **Statistical Decision Modeling** — Hypothesis testing, multiple regression & correlation for a multi-million-dollar acquisition (Sleep Cool Mattress).
- ◆ **Consumer Behavior Analysis** — Large-scale Six Flags behavioral analysis surfaced in interactive Tableau dashboards.
- ◆ **Optimization Modeling** — Linear programming & sensitivity analysis for LEGO production planning and resource allocation.
